

A58 BEAUMONT ROAD (BOLTON RING ROAD), MAJOR STRUCTURAL MAINTENANCE

Client:

Bolton MBC

Summary:

Reconstruction of a major part of
Bolton's ring road.

PROJECT DETAILS

Part of a 'Strategic Partnering Arrangement' between AEY & Bolton MBC for Highway Works. Negotiated contract for major structural maintenance to part of Bolton Ring Road under ECC Option 'C'. Conversion of four lane single carriageway road into four lane dual carriageway over 1.16km, between A673 Chorley New Road and Armadale Road. Works included removal and replacement of kerblines, formation of new central reserve, footway & carriageway reconstruction in bituminous materials, reconstruction of two existing major signalised junctions plus the construction of a new signalised junction. All associated traffic management, signs & lines and extensive PR.

The section of Beaumont Road between Armadale Road and Wigan Road was undertaken simultaneously to our scheme by another Framework Partner of Bolton MBC, Associated Asphalt. All three parties worked together as a single team to ensure delivery to a tight programme and strictly limited budget.
