

HIGHWAY WORKS ON DUKE STREET, ST. GEORGES ROAD & TOPP WAY, BOLTON.

Client:

Bolton MBC

Summary:

Part of the ongoing Bolton Town Centre Transport Strategy works to improve public access into the town centre. Works order through our 'Major Highways Framework' with Bolton MBC.

PROJECT DETAILS

The contract involved the construction of a new slip road from Topp Way onto Duke Street and resurfacing of both roads, the installation of traffic signal ducting and access boxes, and narrow widening for the upgrade of the junction of Duke Street with St. Georges Road.

Gullies, kerbing and paving works were carried out. The paving used was locally recycled Yorkstone Paving to complement the surrounding area. Liaison was carried out throughout the works with the bus operators, adjacent churches, shopkeepers and residents to ensure minimum disruption to their ongoing businesses.
