

## CANAL RESTORATION PROJECT ROCHDALE, GREATER MANCHESTER

Client:

**Town Centre Securities**

Summary:

Canal renovation & construction of a new marina as part of a major city centre commercial, residential & leisure development.

### PROJECT DETAILS

**Construction of new marina on the Rochdale Canal, as part of a major development in the heart of Manchester.**

Works include the dewatering and overpumping of canal throughflows, the excavation and disposal of fill materials within the abandoned and partially infilled 200M length of canal, including the handling and disposal of highly contaminated silts and water (including special waste).

Sheet piling, exposure, power washing, inspection and repair/reconstruction of the existing brickwork and masonry canal walls, lock repairs and renovation.

Excavation for new marina (4500 cu.m), construction of RC brick faced marina walls, together with copings and hardwood fenders.

Liaison with British Waterways, the Environment Agency, Manchester City Council and NWW throughout the works.
