

HORIZONTAL DIRECTIONAL DRILLING AT AINTREE RACECOURSE

Client:
Arden Lea Irrigation

Summary:
Install irrigation system

PROJECT DETAILS

Install 4No x 125mm irrigation pipe across the old British Grand Prix Track which is protected and the back straight of the Grand National course.

The irrigation system was required to water the back straight of the course which due to the lack of rain over recent years had become too fast and was tiring the horses out causing them to fall.

This project was undertaken in a very tight time frame so the irrigation system would be up and running for the Grand National.

GROUND CONDITIONS

- Mixture of sand and clay
