

HORIZONTAL DIRECTIONAL DRILLING AT BEDFORD STW

Client:

**Anglian Water
@One Alliance**

Summary:

Installation of twin rising mains

PROJECT DETAILS

HORIZONTAL DIRECTIONAL DRILLING

A E Yates Trenchless Solutions installed twin 180mm rising mains approx 150m long under numerous existing services and 900mm outfall from works. In addition high back ground interference proved testing for tracker to ensure bores hit the desired exit point. Despite the presence of nearby gravel pits, the bores were installed in good clay.
