

HORIZONTAL DIRECTIONAL DRILLING AT MORLEY RETREAT

Client:
Morley Retreat

Summary:
Installation of Heat Pump
Harvesting Grid

PROJECT DETAILS

HORIZONTAL DIRECTIONAL DRILLING

A E Yates Trenchless Solutions completed the installation of their first ever Heat Pump Harvesting Grid at Morley Retreat near Derby. The project involved the HDD installation of approximately 2000m of 50mm and 32mm MDPE Harvesting pipe within the wall garden at Morley Retreat.

HDD was the preferred option of installation as it vastly reduced the amount of excavation and reinstatement required and caused less disruption. Heat pumps are extremely environmentally friendly alternative to conventional boilers and is a rapidly growing market within the UK.

GROUND CONDITIONS

- Sandy Clay
