HORIZONTAL DIRECTIONAL DRILLING AT PANDY TUDOR, WALES

Client:
Dwr Cymru
Welsh Water

Summary:
Pandy Tudor Water Main Replacement

PROJECT DETAILS

HORIZONTAL DIRECTIONAL DRILLING

As part of Dwr Cymru Welsh Water Rural Water Main Replacement Programme AEYTS recently undertook the horizontal directional drilling installation of nearly 2000 metres of 110mm water main across farmland at Pandy Tudor in North Wales.

Directional drilling was the preferred installation method as productivity was higher, meaning disruption to the local farmers was reduced.

GROUND CONDITIONS

• Gravel and clay
