

CEMENT STABILISATION AT LOCH RYAN PORT, STRANRAER

Client:

Stena Line

PROJECT DETAILS

CEMENT STABILISATION AT FERRY PORT

CSSL were awarded the contract to carry out works on the new port (which would relocate Stena Line's operations from Stranraer to the new Loch Ryan Port) by P T McWilliams.

Works carried out by Combined Soil Stabilisation

The two companies worked together to construct a CBGM layer with CSSL incorporating Cement into a site won aggregate laid by P T McWilliams. A successful trial was carried out with the contract being completed over several phases.
