

SOIL STABILISATION AT TESCO STORE, GREAT HARWOOD

Client:

DCT Civil Engineering for Tesco

PROJECT DETAILS

SOIL STABILISATION FOR TESCO STORE

The site, a former factory, was being redeveloped to provide a new Tesco Store in Great Harwood, Lancashire.

Works Carried out by Combined Soil Stabilisation

DCT Civil Engineering approached CSSL to provide a 300mm Cemented Capping Replacement. Due to the location of the site, directly in the town centre, a WR2500SK Integrated Mixer was used to eliminate any dust problems. The works were then successfully completed in 2 phases.
